**To whom it may concern**

Re: William Bullock,

Will worked in our laboratory department for 2 years between 2014 and 2016 as a Biomedical Scientist. His role required analytical work providing diagnostic testing on patients, predominantly blood sample analysis. His work quality was very good and he was very enthusiastic and committed to the position whilst here. He got on well with his peers and we were sad when he decided to leave our service but understood his ambition to develop his career by undertaking further academic qualifications. We would recommend him as an employee and I would be happy to re-employ in the same role.

Kind regards
